Shade in Swiss Quality

## GUIDELINES

---

### Functionality

We develop our products according to the principle that design follows functionality. Our sunshades therefore offer optimum protection and can be adapted to the position of the sun. Aligned on ergonomic principles, all of our models are easy to operate and are robust. Thanks to high-quality materials, they can withstand the most adverse weather conditions.

---

### Design & individuality

Shape and aesthetics combined with individuality – that is what design means to us: with GLATZ, the customer specifies how their sunshade looks! In addition to customised individual production, we have a wide range of design models which are standard-sized or large, circular or square and made of materials in a variety of classes and approximately 90 different colours.

---

### Innovation

We are always two steps ahead of the market. However, we do not equate innovations with new products! Our focus is on functionality and design. It is no coincidence that we have the largest number of patents and applications for design protection in the whole of Europe.

---

### Quality

“Made by GLATZ” stands for a love of detail and a long life span. High-quality materials and production technology in line with international standards combined with constant quality controls for sunshade manufacturing mean our customers can be sure of one thing: the best Swiss quality from GLATZ.

---

### Sophisticated solutions

Customers looking for their ideal sunshade will find more with us: an outdoor solution by GLATZ! Our comprehensive range of accessories is compatible with almost all of our models and individually adapted to customer requirements.

---

### Sales service

Our products are distributed almost worldwide via a network of resellers and importers. For us and our certified partners, there is just one focus: to offer customers expert and solution-oriented advice and respond immediately to service enquiries.

## GLATZ – YOUR PARTNER

---

### FOR TERRACES AND GARDENS

One thing is guaranteed not to happen at home: closing time! With our sunshades, anyone can stay outdoors as long as they like – even on cool days or late in the evening. Whatever the setting – futuristic, neo-classical or contemporary architecture, romantic gardens, spacious or awkwardly shaped terraces and balconies or stylish pool areas – all of the sunshades from GLATZ are both modern and timeless, blending into their surroundings like a chameleon and contributing discreetly to the outdoor ambience. With its centre-pole and free-arm sunshades made of aluminium or wood, GLATZ offers supreme comfort in terms of privacy and protection from the sun and rain. The sunshade models are equally impressive when it comes to functionality and handling: all of them can be rotated, tilted and slanted effortlessly, while the large selection of colours and elegant design make them an eye-catching feature of your private outdoor area.

### FOR HOTELS AND RESTAURANTS

Caterers, hoteliers and restaurant owners work hard every day to give their guests the best! In Basel or Berlin, Gstaad, Sylt or Madrid, hospitality is characterised by a feeling of safety, comfort and quality – all that and much more is provided by GLATZ's highly functional centre-pole and free-arm sunshades made of aluminium or wood in different designs, sizes, shapes, colours and with various functions.

Many hotel and restaurant owners are starting their garden season early and ending it later than others, thanks to GLATZ's giant restaurant sunshades. With these sunshades, more time can be spent outside, which increases revenue. Our highly functional restaurant sunshades not only offer a pleasant atmosphere, comfort and UV protection in the shade; they also protect against wind, rain and cold. All sunshades are easy to operate and some models can be equipped with light fittings, heaters, motors and radio installations if desired.

## HISTORY

---

GLATZ AG – this is who we are: a Swiss family company shaped by experience and motivated by our vision – and one of the leading sunshade manufacturers in Europe and throughout the world. It is no surprise that we have a company history spanning more than 100 years and are still as innovative as ever. This is partly because our founding fathers' maxim remains our philosophy today: keep your finger on the pulse and be ahead of your time!

GLATZ has always been conscious of its role as a pioneer. In 1895, Albert Glatz found a lucrative niche that went on to become a successful business under the leadership of his son, Albert Junior. Later, Dölf Glatz successfully developed technical solutions that found worldwide recognition.

Now in its fourth generation, the company is led by Markus Glatz with a single-minded focus on the best possible shade solution, combining maximum functionality, sophisticated design, Swiss quality and technical know-how. Whether sunshades for terraces and gardens or outdoor concepts for catering: even today, our product designers are developing ideas for tomorrow. Our designs are classic and our quality is first-class. When it comes to development, manufacturing, advice or service, we put our heart and soul into our work and make our customers our priority! In our view, there is no better place to enjoy the sun than under a GLATZ sunshade!

## POINT OF USE

**HOTEL & RESTAURANT** This sunshade model is particularly suitable for the everyday demands of hotels and restaurants. It can be combined with other models of different colours, shapes and sizes.

**MEADOW** This functional and robust sunshade model is highly recommended for large and small lawns.

**TERRACE** Whether your terrace is large, small, square or rectangular, this model adapts to its surroundings and sets the perfect tone in your outdoor area.

**BALCONY** This model puts every last corner of the balcony in the shade and takes up almost no space thanks to its design.

## FASTENINGS

**BASE** This sunshade type can be attached to a base or a weighted pedestal, so it can be moved at any time without complex installation.

**GROUND SOCKET** If the sunshade model will be fixed in one place, a ground socket set in concrete is the ideal choice.

**LAWN SPIKE** Thanks to a lawn spike sunk into the ground, this model can be moved very quickly to a new location in the soft ground.

**BALCONY CLAMP** Where space is at a premium, this sunshade model can be fastened to the balcony railing with a clamp.

**WALL CLAMP** Walls are no obstacle to us, because this sunshade model can be easily fastened to them with a wall clamp.

**ADVICE** For owners of GLATZ sunshades, the safest option is to use original GLATZ accessories for the best possible fastening and stability. This is the only way to guarantee optimum performance and the GLATZ warranty.

# INDIVIDUAL

## Made-to-measure sunshades

Our range of models is as individual as our customers. As well as a wide variety of shapes, colours and sunshade types including comprehensive accessories, we produce customised sunshades at the customer's request and offer a total outdoor solution. This includes extensive advice and a presentation, demonstration and explanation of selected sunshade models at our distribution partners' showrooms. What's more, customers can take advantage of a home delivery service: on request, GLATZ's distribution partners will personally deliver the selected sunshade including accessories to the customer, install it in the desired location – thanks to expert staff trained by us – and show how to operate the respective model. Needless to say, the packaging material is taken away, our partners respond promptly and efficiently to queries and will quickly deliver spare parts and carry out repairs should the need arise (some online purchases are excluded from this service package).

## *easy* COLLECTION

Many sunshade models are also available “to go” – in our *easy* Collection of portable sunshades. Budget-conscious consumers and impulse buyers seeking sun protection will find everything they need here in terms of functionality and quality – only the selection of colours and materials is limited. All of the *easy* models are available to collect from our distribution partners and can be set up in next to no time. And as the name suggests, they are all easy to handle.

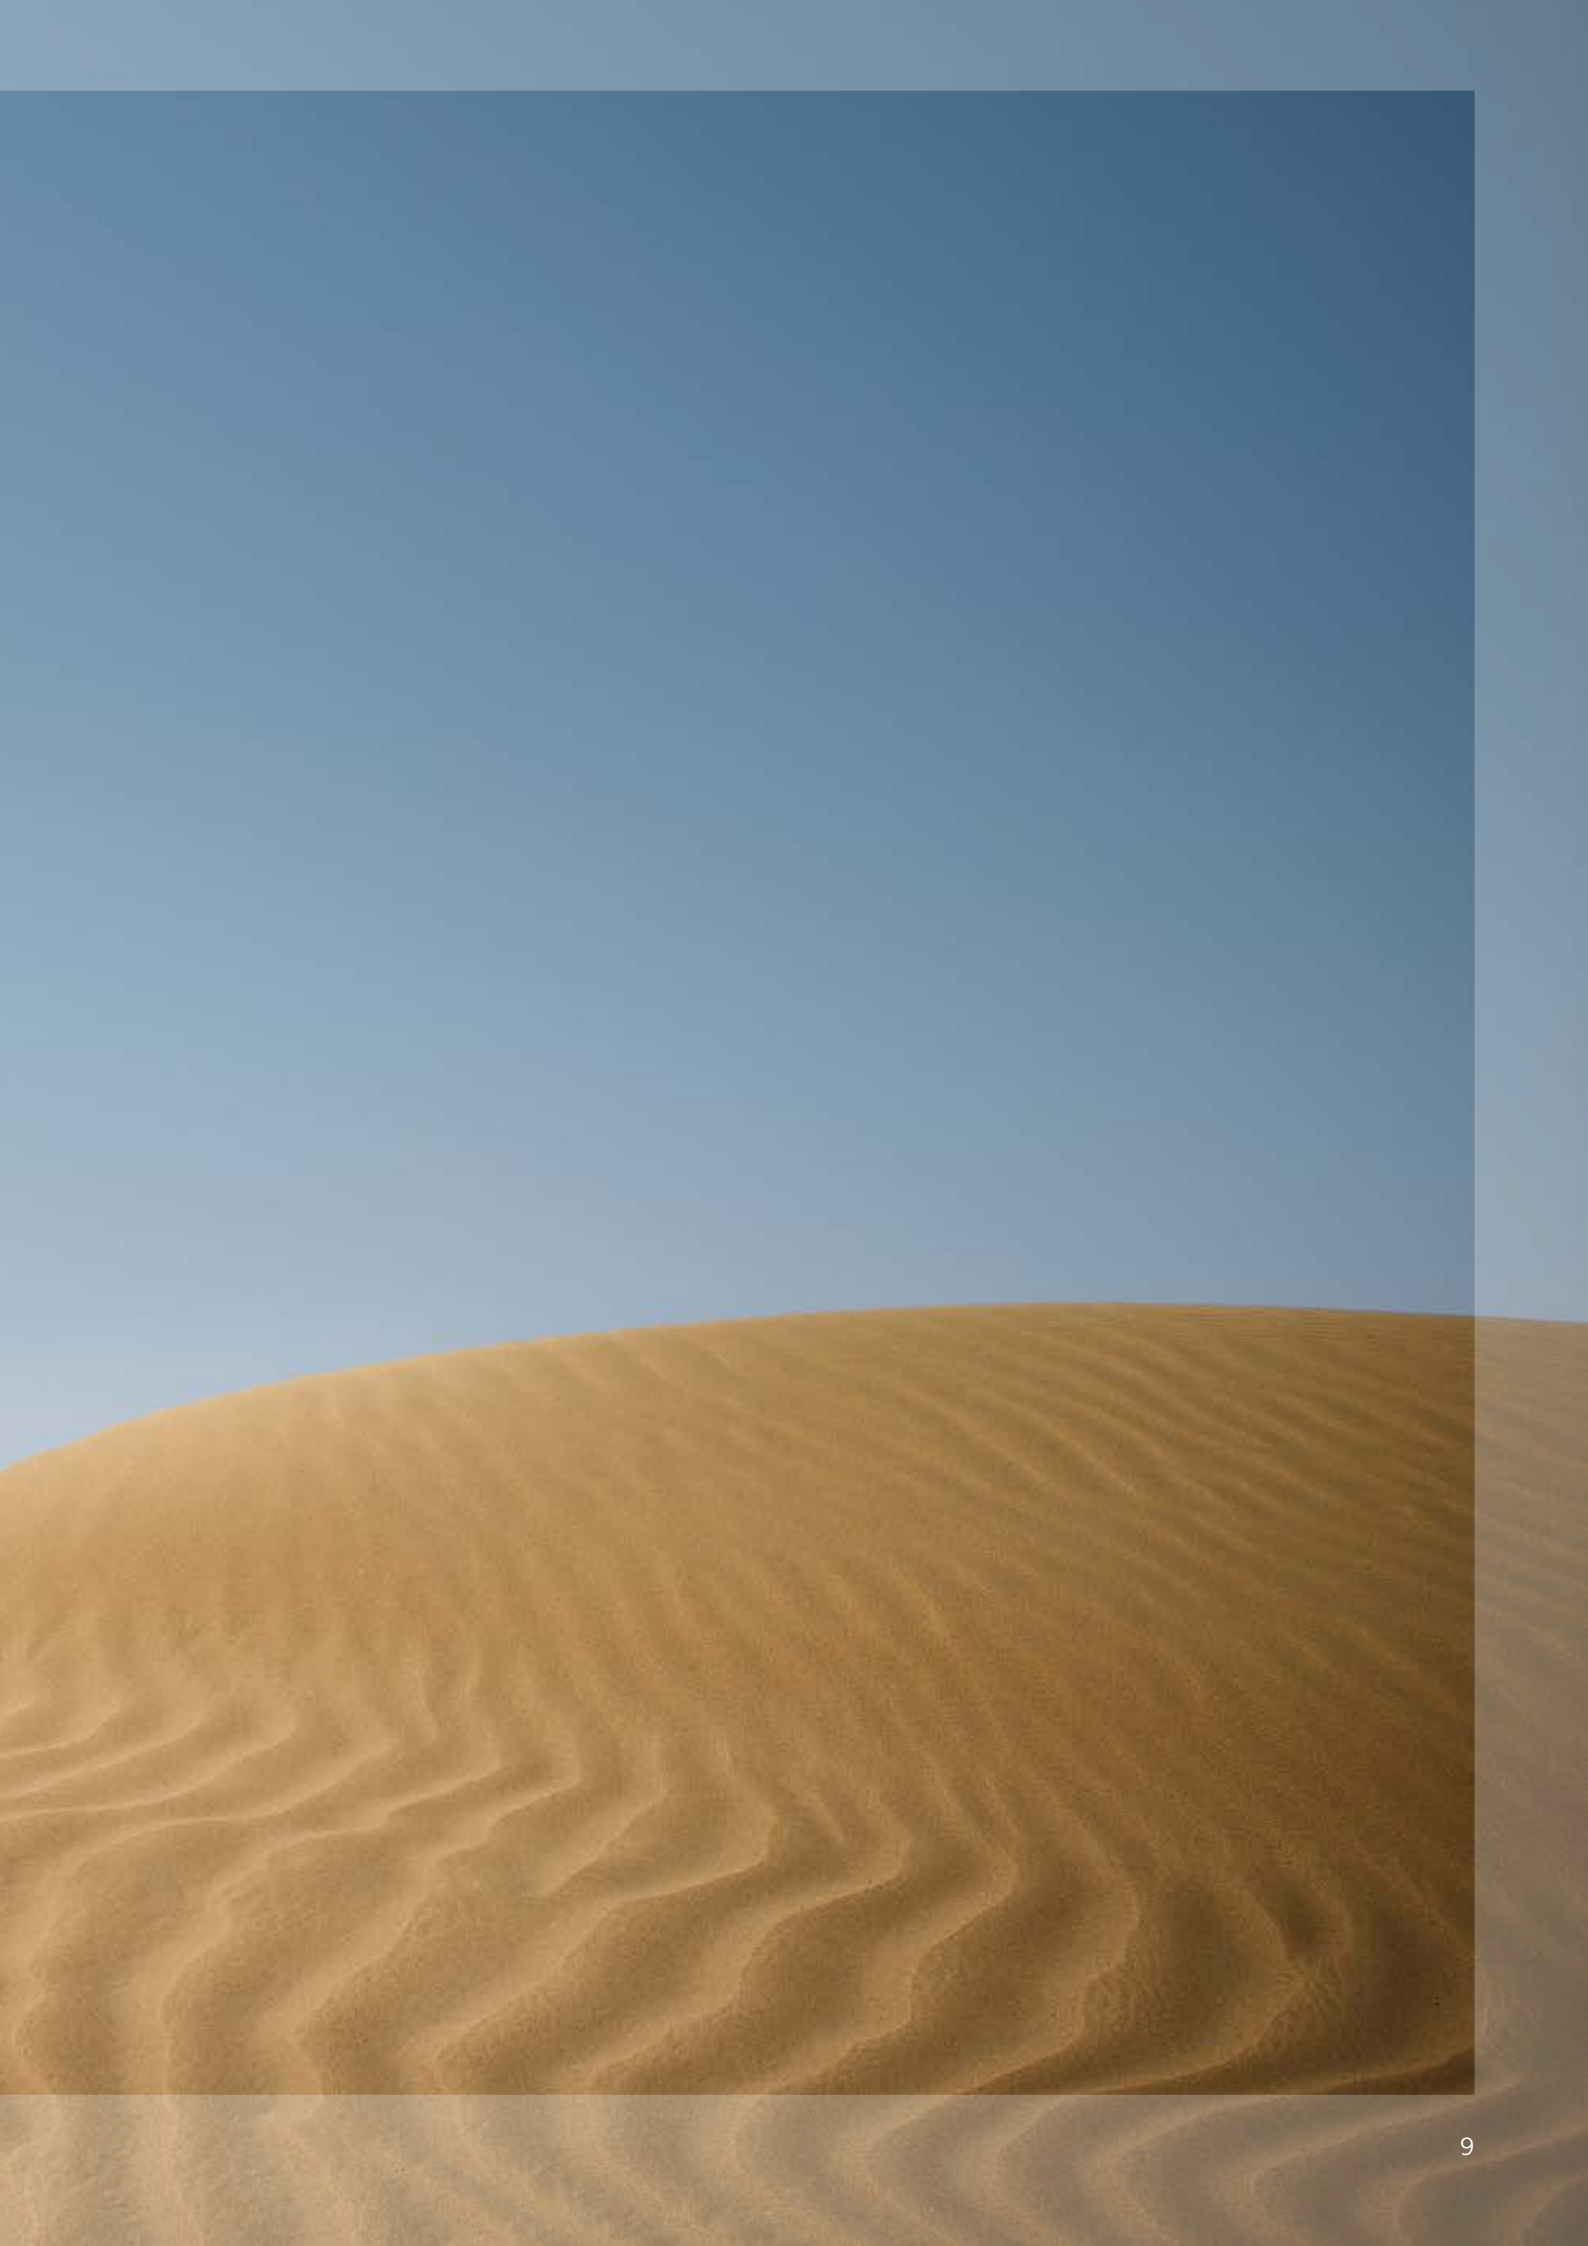

ALEXO®

# ALEXO®

## The classic

Young or old – everybody knows this sunshade. GLATZ has been producing the gear-jointed Swiss design icon ALEXO® for more than eight decades. Even from a distance, the top of the umbrella signals that fine craftsmanship is celebrated here. Other characteristic features include its round frame, with a diameter of either 200 cm or 220 cm as desired, with or without flounces as well as a varnished ash wood support pole. With its nickel-plated brass gear joint and long centre pole, the sunshade cover can be tilted in several stages to align with the position of the sun. Balcony clamps, ground sockets and mobile bases are optionally available as anchorage.

ALEXO® Int. Patents reg.

Ø 220

- 1 **Material class 5\*:** Colours 500 – 699, Sun protection UPF 50+  
**Material class 4\*:** Colours 400 – 499, Sun protection UPF 50+
  - 2 **Material and technology:** The pole is made of varnished ash timber, the gear rim joint of nickel-plated brass. The cover of the ALEXO® without flounces is reinforced with leather corner mounts.
  - 3 **How to operate:** To open it, hold the sunshade at a comfortable angle and push the slide outwards until it clicks into place. Then, angle the sunshade according to the location of the sun, using the finely ribbed gear rim joint.
- **Accessories:** Protective cover optional

PIAZZINO

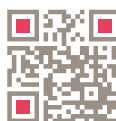

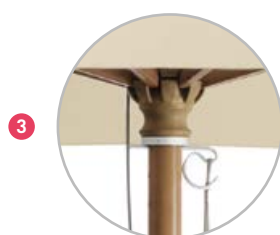

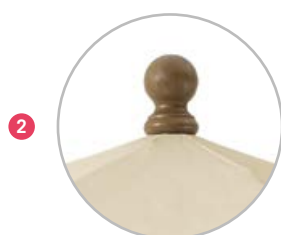

# PIAZZINO

## The low-priced classic

This functional sunshade dispenses with high technology and is easy on the wallet: the PIAZZINO! The natural-colored maple wood gives the charming sunshade roof a romantic touch and provides guests with lots of space to relax in cozy shade. The tough and long-lasting maple wood used for the wood construction guarantees that this sunshade will work flawlessly for years. The PIAZZINO is at the top of its game in the league of timeless format and style at an affordable price.

TEAKWOOD

# TEAKWOOD

## The Rolls Royce of classic sunshades

Technological progress is also finding its way into wooden sunshade production. Customers who want to lend the flair of times gone by to their establishment opt for the TEAKWOOD. This wooden sunshade has something that enchants many people: nostalgic charm! The TEAKWOOD's characteristics are its fine materials, such as natural teak wood, rustproof metal fittings and corner mounts reinforced with leather as well a double pulley system. Its new, high-quality patterns and colours mean that the TEAKWOOD will never look old. Opening the TEAKWOOD releases a breeze of freedom. By pulling the double pulley system and fixing it with a metal pin, the sunshade roof can be set like the sail of a fine yacht.

ALU-PUSH

# ALU-PUSH

## The flexible sunshade

GLATZ's smallest aluminium sunshade has much to offer. In certain situations, it's simply the best! Whether on balconies or terraces: with its practical dimensions, the ALU-PUSH is the ideal sunshade for small spaces and fits almost any irregularly shaped corner. The tilt joint can be angled according to shade needs and adjusted for height whenever necessary. The ALU-PUSH is also perfect in combination with GLATZ giant sunshades. Further plus points: the frame is made of aluminium with a striking mast and the sunshade is replaceable and self-tautening, thanks to its flexible rod ends.

ALU-PUSH, Int. Patents reg. ©Int. Design reg.

- 2 **Material and technology:** The aluminium, anodized natural, frame has a profiled pole and a tilt joint for stepless height adjustment. The cover is replaceable and self-tautening thanks to the flexible rod ends.
- 3 **How to operate:** Simply push the canopy upwards until the mechanism clicks into place. So little is needed to open your sunshade! And now you can tilt the canopy thanks to the tilt joint. ALU-PUSH also adjusts in height.
- 4 **Electrical accessories:** Osyrion 6 rechargeable battery light or Osyrion 4 rechargeable battery light
- Accessories:** Protective cover with zip and rod optional
-  This model is also available in the portable *easy* range, i.e. in **material class 2\*\*:** Colours 127 / 146 / 150 / 151 / 155\*\*\* / 162, Sun protection UPF 50+

ALU-TWIST

# ALU-TWIST

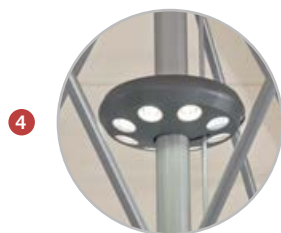

## The comfortable sunshade

Ease of use, technology and design are perfectly combined in this centre-pole sunshade: the ALU-TWIST! Thanks to the comfortable height of the crank, the shade roof can be opened and closed with ease and set at any angle using the twist mechanism. Thanks to its flexible rod ends, the cover is replaceable and self-tautening. Its corrosion-free material guarantees a long life for your sunshade: the frame and rods are made of aluminium. In short: the ALU-TWIST is tailor-made for awkwardly shaped outdoor areas or to complement giant sunshades and lends every lounge or garden seating area the desired touch of timeless, modern design.

FORTINO®

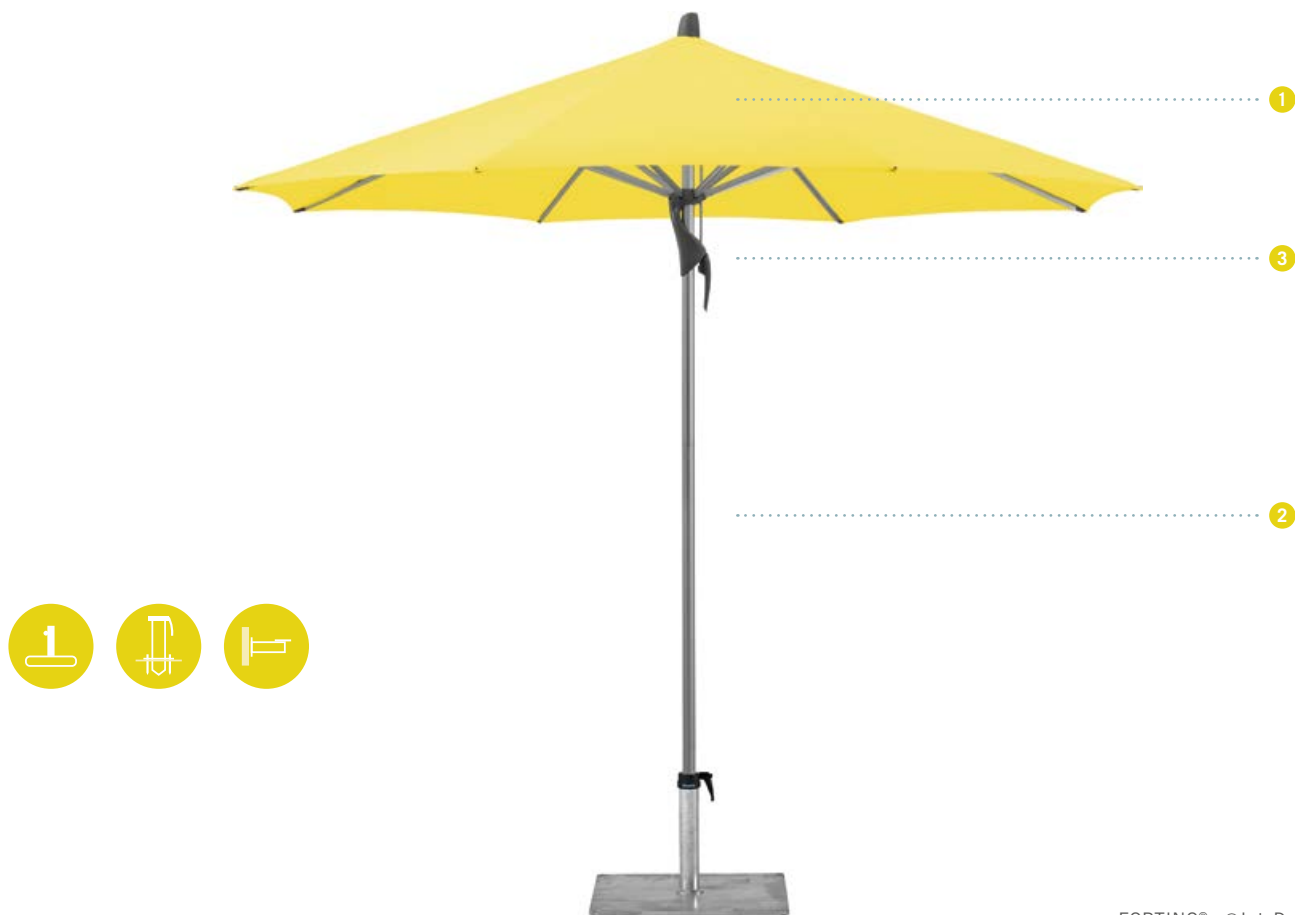

# FORTINO®

## The little wind-resistant sunshade

The little FORTINO® goes wherever shade is needed: in the lounge or at the bar – thanks to its dimensions it can be moved to a new location in the blink of an eye. On the terrace, in the garden or by the pool – thanks to its small size, the FORTINO® can accompany you wherever you go! Small, but tough: thanks to its stable construction, the FORTINO® is wind-resistant and can optionally be fitted with a concrete, steel or granite base. A sleeve fixed to the ground is recommended if the FORTINO® is to have a regular location in the garden or on a terrace.

FORTERO®

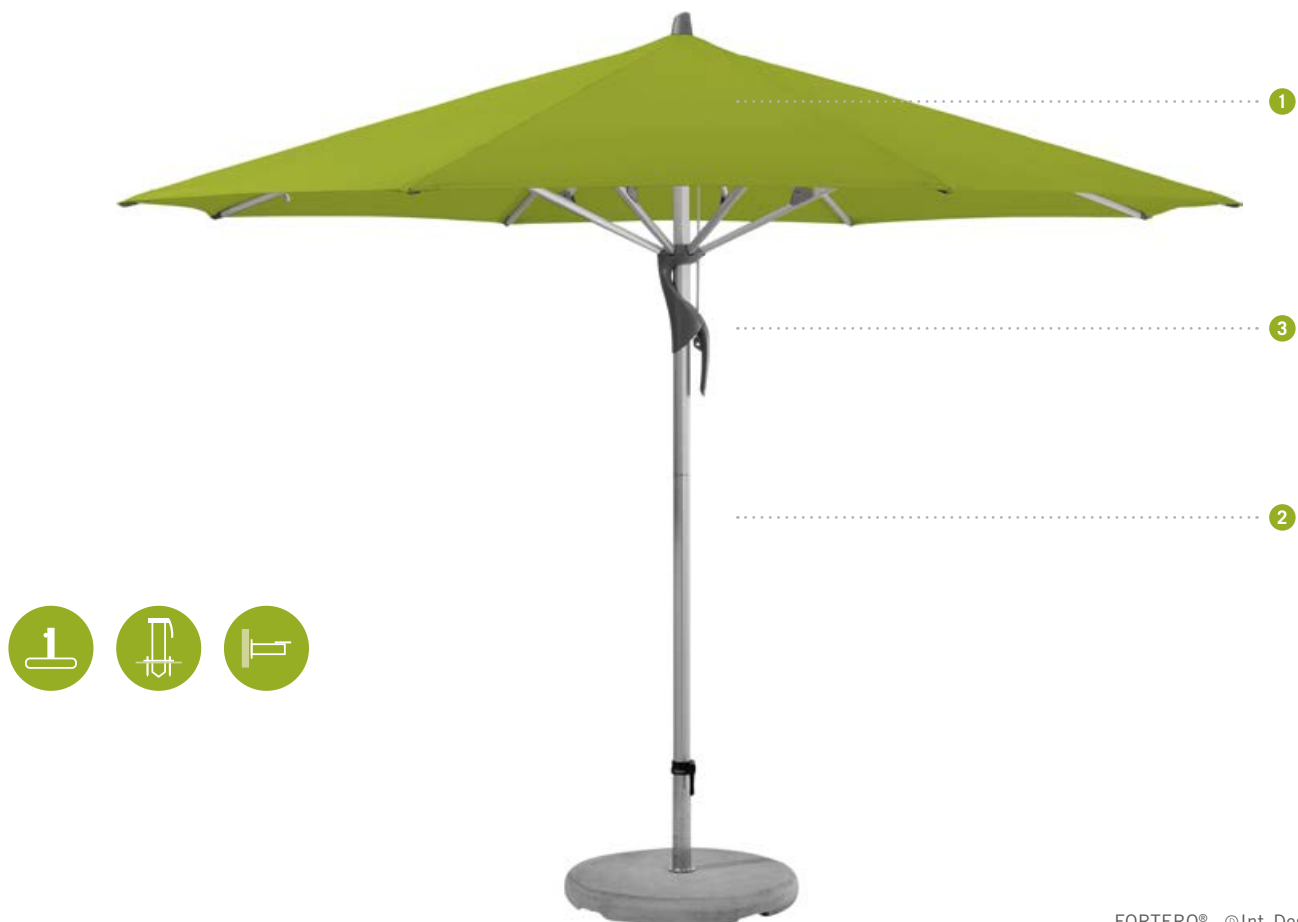

# FORTERO®

## The big wind-resistant sunshade

The FORTERO® giant sunshade is big enough to stand up for itself: wind-resistant, resilient and easy to operate, this model is ideal for large spaces and windy places. It certainly lives up to its name: FORTERO® – the strong one. Thanks to the counter-rotating servo principle, the FORTERO® is easy to open and close. Its simple design and size mean that the FORTERO® is ideally suited for large spaces or by the pool. Optional attachments include concrete or granite bases as well as bases with castors, support tubes and plates, mounting plates with support tubes and various wall clamps together with support tubes. Thanks to its stable construction, FORTERO® can withstand coastal and mountain wind conditions.

FORTELLO®

# FORTELLO®

## The perfect balance

Not too big and not too small, the FORTELLO® is ideal for hotels and restaurants: thanks to its counter-rotating servo opening principle it is easy to handle, can be conveniently transported with its separable pole and light weight and can be cleared away in a flash. Thanks to its stable construction, the FORTELLO® can withstand wind speeds of up to 50 km/h and can be fitted with an Osyrion light on request. This model by GLATZ not only provides optimum protection from the sun and rain, it also offers one thing above all: an ideal space for coloured advertising logos and lettering. The FORTELLO® is available in round format with a diameter of 450 cm as well as square format in the sizes of 400×400 cm and 350×350 cm. Its wide range of applications makes it outstandingly suitable for hotels and restaurants.

FORTELLO® LED

## FORTELLO® LED

### The umbrella for day and night

Nobody is left in the dark with this umbrella. During the day the FORTELLO® LED offers protection from sun, wind and rain and in the evening, the LED strips integrated into the ribs give off a warm white light, optionally adjustable to two brightness levels. The FORTELLO® LED is the newcomer in the model family and, just like his brother FORTELLO®, meets all expectations of the hotel and restaurant industry. Thanks to the counter-rotating servo opening principle, both are easy to operate and with their detachable pole and light weight they are convenient to move and use in a variety of settings. Outdoor beer garden or trendy bar, one thing is for sure: The FORTELLO® LED is the umbrella for day and night.

SOMBRANO® S+

# SOMBRANO® S+

## The big 360° sunshade

This functional free-arm sunshade by GLATZ is a big 360° shade provider and has an elegant new look thanks to its subtly redesigned frame. Like the existing model, the SOMBRANO® S+ can be easily opened and closed simultaneously using a self-locking crank mechanism on both sides. Thanks to a new self-locking crank mechanism on both sides, the SOMBRANO® S+ can be simultaneously extended, opened and closed, while the sunshade cover can be tilted 54° on both sides in 18° steps using the tilting rod and rotated through 360° thanks to the turnable ball bearing base. Due to its size, the SOMBRANO® S+ is ideal for larger outdoor areas.

SOMBRANO® *easy* available in the classic design

PENDALEX® P+

# PENDALEX® P+

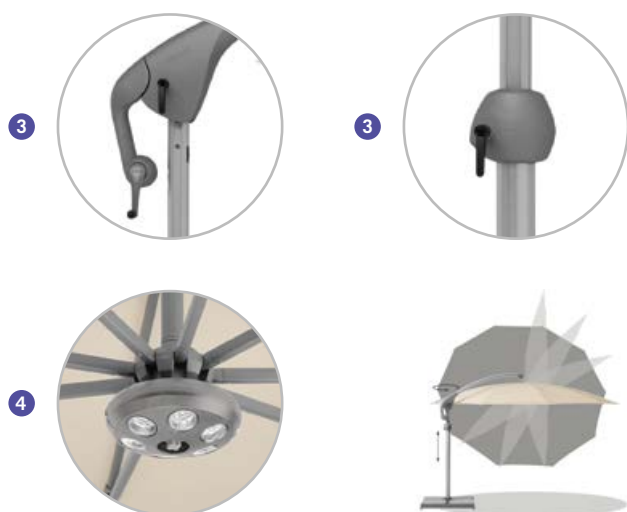

## The multifunctional all-rounder

The PENDALEX® P+ is more than just a shade provider: its technology, handling and high-quality materials such as aluminium, glass fibre-reinforced TSG synthetic material and galvanised, powder-coated spring steel struts are designed for intensive use. This sunshade is opened and closed using a crank mechanism. Thanks to a gas pressure spring in the pole, the sunshade height can be easily adjusted. The ball-and-socket joint made of hard anodized aluminium allows stepless tilting of the sunshade cover up to 90° in all directions and 360° rotation around the pole. Despite its size, the PENDALEX® P+ takes up virtually no space when closed: it can easily be left outside in winter – for many years to come.

PENDALEX® P+, Int. Patents reg. ©Int. Design reg.

Nominal size cm      Nominal size cm

Ø 300	285 × 230

Ø 350	

- 1 **Material class 5\***: Colours 500 – 699, Sun protection UPF 50+  
**Material class 4\*\***: Colours 400 – 499, Sun protection UPF 50+
- 2 **Material and technology**: The profiled telescopic pole and free arm are made of naturally anodised or anthracite powder-coated aluminium, with shells made of fibreglass-reinforced TSG synthetic material. Teflon-modified high-performance synthetic material has been used for the guides. The struts are made of tempered spring steel, galvanized and powder-coated. The GLATZ ball-and-socket joint consists of forge-pressed hard anodized aluminium.
- 3 **How to operate**: Open and close the sunshade with the crank on the free arm. The sunshade height can be easily adjusted using the gas pressure spring (50 cm lift) in the pole. The free arm runs on roller guides and can be progressively extended. The GLATZ ball-and-socket joint allows the sunshade roof to tilt steplessly in all directions up to 90°. The sunshade can be easily and steplessly rotated 360° around the pole.
- 4 **Electrical accessories**: Osyrion 6 rechargeable battery light or Osyrion 4 rechargeable battery light
- **Accessories**: Protective cover with zip and rod included in the delivery

PENDALEX® V+

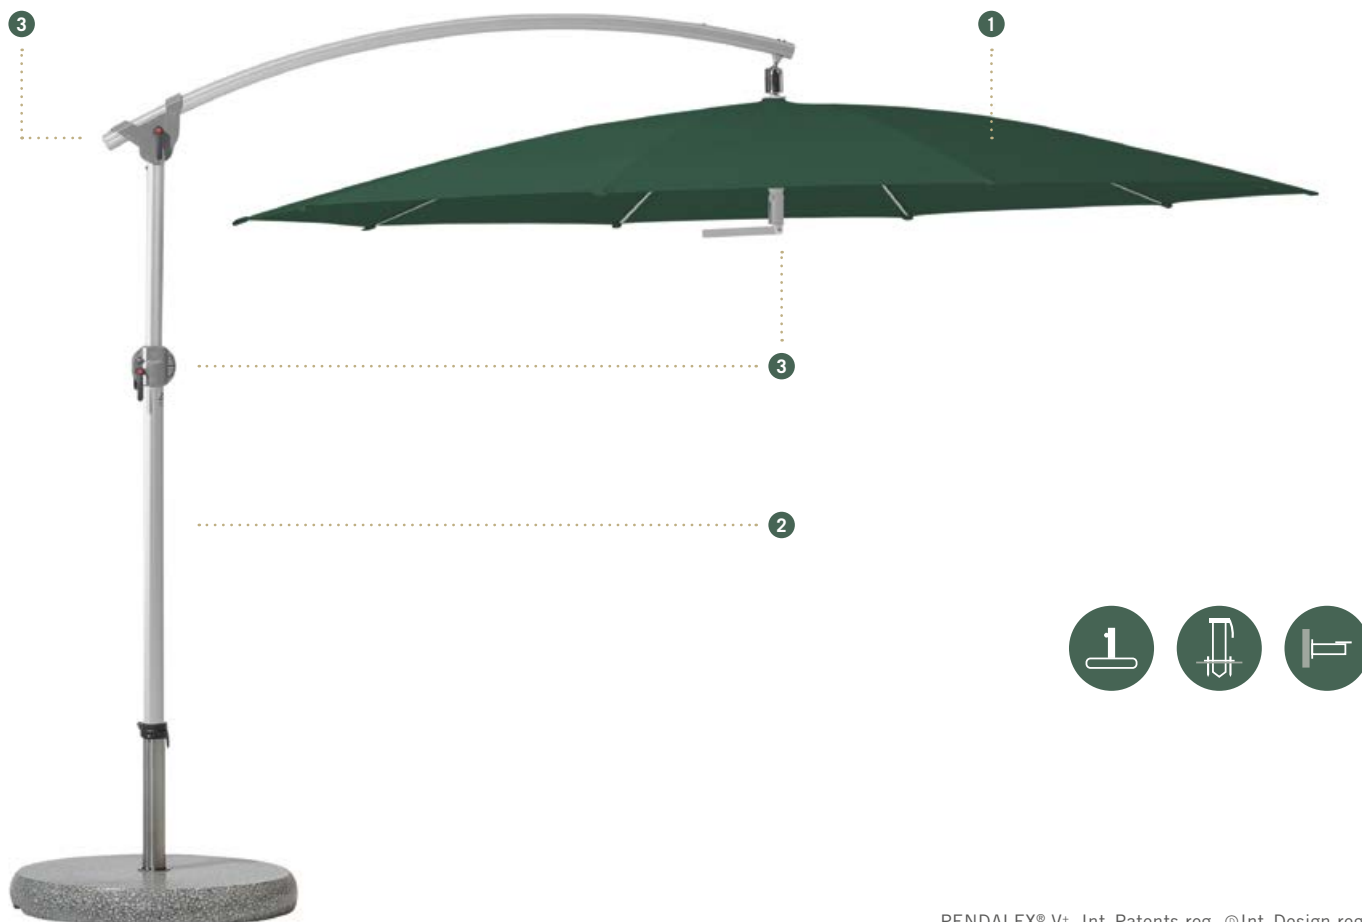

# PENDALEX® V+

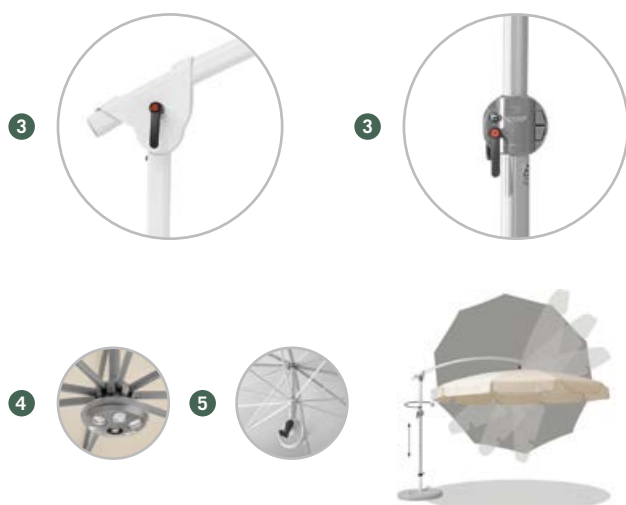

## The sunshade with a plus

The PENDALEX® V+ sunshade model is perfect for privacy and sun protection, and has everything a modern classic needs: robust technology, high-quality materials and modern design. Thanks to the gas pressure spring built into the pole, the height of the PENDALEX® V+ can also be effortlessly adjusted. The ball-and-socket joint allows stepless tilting of the sunshade cover up to 90° in all directions and can be unhooked from the cantilever without a problem thanks to the bayonet joint.

Ø 325	

PENDALEX® V+ is available as long as supplies last.

- 1 **Material class 5\***: Colours 500 – 699, Sun protection UPF 50+  
**Material class 4\*\***: Colours 400 – 499, Sun protection UPF 50+
- 2 **Material and technology**: The supporting elements are made of naturally anodised, white powder-coated or anthracite powder-coated aluminium profiles. The V+ joint and double clamp are made of drop-forging Rilsan-coated aluminium. The struts are made of tempered spring steel, galvanized against corrosion and powder-coated. The ball-and-socket joint is made of forge-pressed nickel-plated brass.
- 3 **How to operate**: The sunshade is particularly convenient to open and close with the optional crank handle set. A gas pressure spring (lift 70cm) makes it easy to adjust the height. The ball-and-socket joint allows the sunshade roof to tilt steplessly in all directions up to 90°. Thanks to the bayonet joint, the roof can be effortlessly removed from the frame.
- 4 **Electrical accessories**: Osyrion 6 rechargeable battery light or Osyrion 4 rechargeable battery light
- 5 **Accessories**: PENDALEX® crank handle set for easy opening, upgradeable for all sizes except Ø 250cm  
 Protective cover with zip and rod included in the delivery

# PROFESSIONAL

## Large & perfect sunshades

---

We are professionals in sun protection, offering professional shade solutions for large outdoor areas in the XXL range – in particular for hotels and restaurants, town planners and large private estates. Many of our distribution partners are authorised to sell our XXL range: they survey the location, work hand in hand with the architects and make allowance for the architectural style as well as space, wind and soil conditions in their planning. We are not just aware of our responsibility; we actively take charge of the delivery, installation and setup of our giant sunshades including original accessories by staff trained by GLATZ in the predefined location. Needless to say, our distribution partners always strive to solve problems on the spot. They arrange a personal conversation with the customer, quickly providing replacements if the worst comes to the worst and carrying out repairs as fast as possible.

AMBIENTE

# AMBIENTE

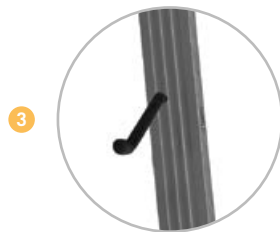

## The XXL chameleon

For a pleasant atmosphere and comfort in the shade, you can rely on the AMBIENTE with its XXL design and span width of up to 5 metres. This special class of free-arm sunshade is impressive due to its dimensions and stable construction. The supporting elements and frame are made of pressed aluminium, while the mechanism consists of cable wires and a rustproof threaded spindle. The shade roof can be opened and closed by crank or an optional motor. Meanwhile, the furniture underneath the shade roof stays put. Depending on the size of the sunshade, the AMBIENTE can easily withstand wind speeds of up to 40 km/h when fixed to the ground.

AMBIENTE, Int. Patents reg.

Ø 500		

- 1 **Material class 5\***: Colours 500 – 699, Sun protection UPF 50+
- 2 **Material and technology**: The supporting elements and the canopy frame are made of pressed aluminium profiles in graphite grey powder-coated or white powder-coated versions. The rope system is operated by means of wire cables and a rust-resistant threaded spindle. All the single parts can be replaced individually.
- 3 **How to operate**: Open and close the sunshade using the removable hand crank or the optional motor drive, with or without remote control. Another option is available: a 210° turnable ground socket.
- 4 **Electrical accessories**: Control board, motor drive, key switch, anemometer
- **Accessories**: Protective cover with zip and rod optional

CASTELLO® M4

# CASTELLO® M4

## The ideal host

With its majestic lightness, the large space sunshade entices you to linger. Its handling is also in line with its pleasing appearance: The CASTELLO® M4 features a counter-rotating telescopic opening principle, allowing the sunshade roof to be raised and lowered using a slide and tensioning lever. One thing you certainly won't find under this sunshade at the height of summer is heat! An opening under the top ensures a constant supply of fresh air. This also makes the CASTELLO® M4 ideal as a smokers' lounge. Another plus: the CASTELLO® M4's tensioning lever can be secured with a padlock. Round, rectangular or square, the CASTELLO® M4 is available in material class 5 and offers UV protection of UPF 50+.

PALAZZO®

# PALAZZO® Style

## The style-conscious one

The younger of its two brothers carries the big family name with pride. And rightly so. It combines both comfort and strength at the same time – in the face of wind speeds of up to 100 km/h, it protects you from both the sun and the rain and wins you over with a multitude of additional functions. The PALAZZO® Style is available in 15 standard models as crank or motorised variants and can optionally be supplemented with heating and LED or conventional lighting. Robust and durable, the all-rounder can be opened or closed with a maximum of 9 turns of the crank by hand or remotely via the integrated motor. We are happy to fulfil your personal requirements in size and shape. A decision which stands the test, the PALAZZO® Style not only offers corrosion-protected steel components but also delights with its colour intensity over the years – thanks to the high-quality material made from acrylic fibres which are coloured right through.

# PALAZZO® Noblesse

## The star performer

High performance and easy operation are what makes this large space sunshade impressive. Depending on the size of the sunshade, the PALAZZO® Noblesse can withstand wind speeds of up to 90km/h, as proven by numerous wind tunnel tests. It opens and closes with just 12 manual turns of the crank or optionally via the integrated remote-controlled motor. Thanks to its construction and high-quality materials made of dyed acrylic fibres, it is not only wind-resistant: it also offers optimum protection from the sun and rain and keeps its colour year after year. The PALAZZO® Noblesse is available in 14 standard designs – with options including a crank, motor, heating and illumination. Customised models can be produced in almost any shape and size.

PALAZZO® Royal

# PALAZZO® Royal

## The premier class

The attractive details of the PALAZZO® Royal are captivating and visually emphasise its functionality. Naturally anodised aluminium combined with a graphite grey finish emphasises the design. Its ease of use is unbeatable: the PALAZZO® Royal opens and closes with a maximum of 19 manual turns of the crank or optionally via the remote-controlled motor. This leaves the seating below undisturbed, as the shut height is higher than 70 cm for all models. The innovative fastening technology ensures optimum fabric tensioning. Important: all control components and cables are integrated into the mast and frame and operated by remote control. The PALAZZO® Royal also has an automatic shutdown mode in case of overheating as well as an emergency function for rapid closing.

# GLATZ COLOUR SPECTRUM

## Stone & Metal

## Earth & Wood

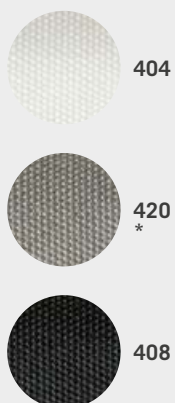

# 5

Material class  
five

# 4

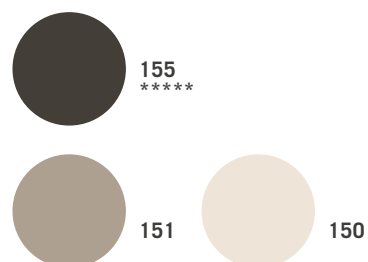

Material class  
four

# 2

Material class  
two

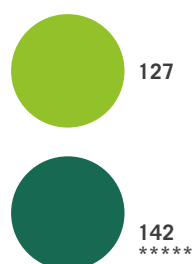

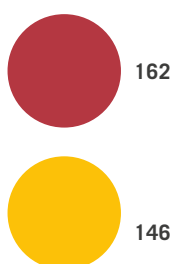

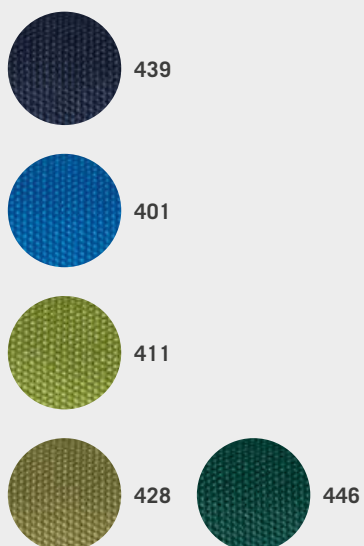

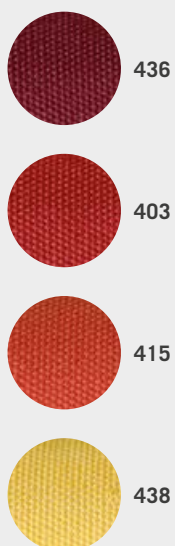

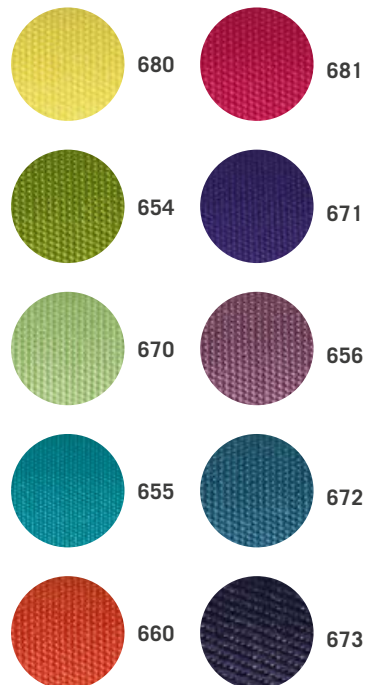

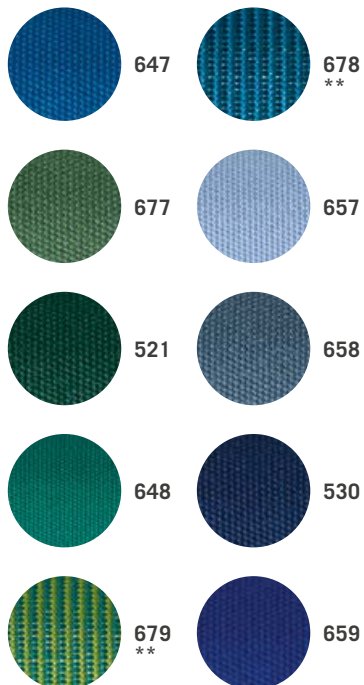

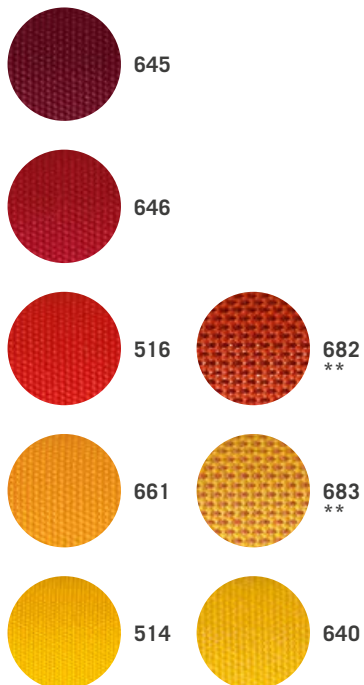

The portable *easy* range is only available in material class 2 in the following colours:

## Fire & Sun

## Water & Sky

## Fresh & Fruity

## LIGHTFASTNESS

---

Not only skin, but also sunshade covers must be protected from strong UV rays. If a sunshade is permanently exposed to the sun, the material will fade over time. How quickly and to what extent depends on the quality of the fabric. GLATZ offers material classes 2 (only available in the *easy* collection), 4 and 5. The higher the material class, the better the lightfast-

ness and, consequently, the longer the fading period – for example material class 2 with an open-air light resistance of 40 – 80 days after direct solar radiation. Material class 4 shows initial colour changes after 350 – 700 days and material class 5 after 700 days.

## UV PROTECTION

---

Every sunshade offers protection from the sun, but not all protect you from dangerous UV rays. Ultraviolet radiation is divided into UVA, UVB and UVC wave ranges. The shorter the wave range, the more harmful it is for your skin. Although UV radiation is in the longest wave range, it is the most dangerous for humans. As well as giving a quick, short-lived tan, it more significantly increases the risk of skin aging and skin cancer. In this respect, GLATZ is a step ahead of other manufacturers and uses thickly woven sun covers that filter UV rays and are rated UPF 50+ in line with the Australian standard.

UPF stands for “Ultraviolet Protection Factor” and is a programme of the Australian government. In this country, solar shading manufacturers can apply to the Australian Radiation Protection and Nuclear Safety Agency to have their products tested – GLATZ AG has done exactly that. All materials from the Swiss sunshade manufacturing company carry the worldwide trademark-protected UPF stamp. The sun protection scale ranges between 15 and 50, with 50 being the best and providing the highest level of protection from UV radiation. Products above this are labelled with the UPF 50+ seal.

**IMPORTANT** All GLATZ fabrics offer sun protection of UPF 50+. You can find detailed information at [www.glatz.ch](http://www.glatz.ch) under „Colorize your GLATZ“.

## ACCESSORIES

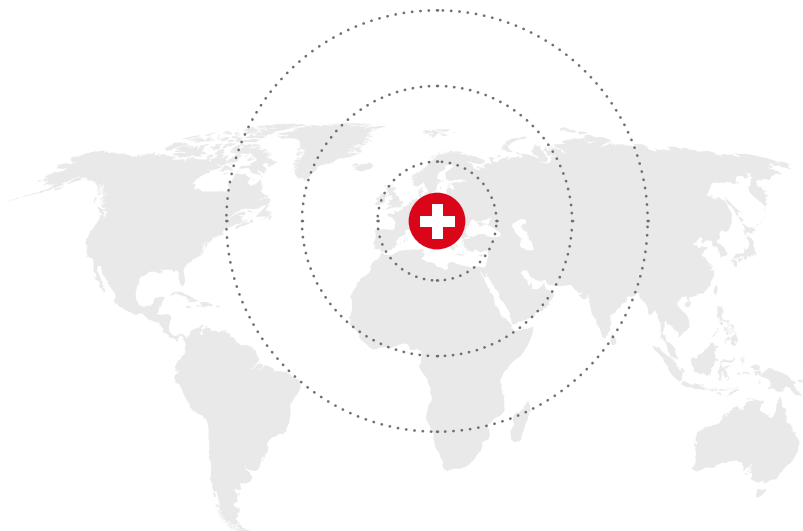

---

Garden owners, outdoor enthusiasts and owners of restaurants, bistros and hotels looking for a sunshade get more with GLATZ: an outdoor solution! Modular heaters, light fittings, motors, sunshade tables, pro-

TECTIVE covers, remote controls, ground sockets, rain gutters, base plates or mounting plates: GLATZ has an extensive range of accessories designed to be compatible with each individual sunshade model.

## SERVICE AND CONTACTS

---

GLATZ AG sells its products via a worldwide network of specialist dealers and importers. For us and our partners, there is just one focus: customer service!

Once a year, we train our dealers to provide expert advice and maintenance, certifying them for service in the event of complaints and repairs.

You can find dealers near you at the website [www.glatz.ch](http://www.glatz.ch)

**GOOD TO KNOW** Depending on the sunshade model, the nearest specialist dealer will set up and install the products and be available to give its customers help and advice. That's a promise!

If you have any further questions, you can contact the call centre on tel. +41 52 723 64 64.
